### 1.Pull an Image from docker hub and run it in docker playground.

The screenshot shows the Docker Playground interface in a Firefox browser. The left sidebar contains a clock showing 03:56:10, a 'CLOSE SESSION' button, and an 'Instances' section with a '+ ADD NEW INSTANCE' button. Below this, a list of instances shows '192.168.0.8 node1'. The main panel displays details for the instance 'cdnnc6m3\_cdnncbe3tccg00b2oabg', including its IP (192.168.0.8), memory usage (1.57% / 62.87MiB), CPU usage (0.41%), and an SSH command: `ssh ip172-18-0-54-cdnnc6m3tccg00b2oabg@direct.labs.play-with-docker`. Below the details is a terminal window showing the following commands and output:

```

The screenshot shows the 'UI For Docker' dashboard in a Firefox browser. The top navigation bar includes tabs for 'Dashboard', 'Containers', 'Containers Network', 'Images', 'Networks', 'Volumes', and 'Info', along with a 'Refresh' button. The 'Running Containers' section shows a single container named 'great\_napier' with a status of 'Up About a minute'. The 'Status' section features a donut chart showing the status of containers: Running (green), Stopped (red), and Ghost (grey). The 'Containers created' and 'Images created' sections show a line graph with a single data point at 1 on the y-axis and 12/11/2022 on the x-axis.

## 2. Create a docker file for the jobportal application and deploy it in Docker desktop application.

### Dockerfile:

FROM python:3.6

WORKDIR /app

ADD . /app

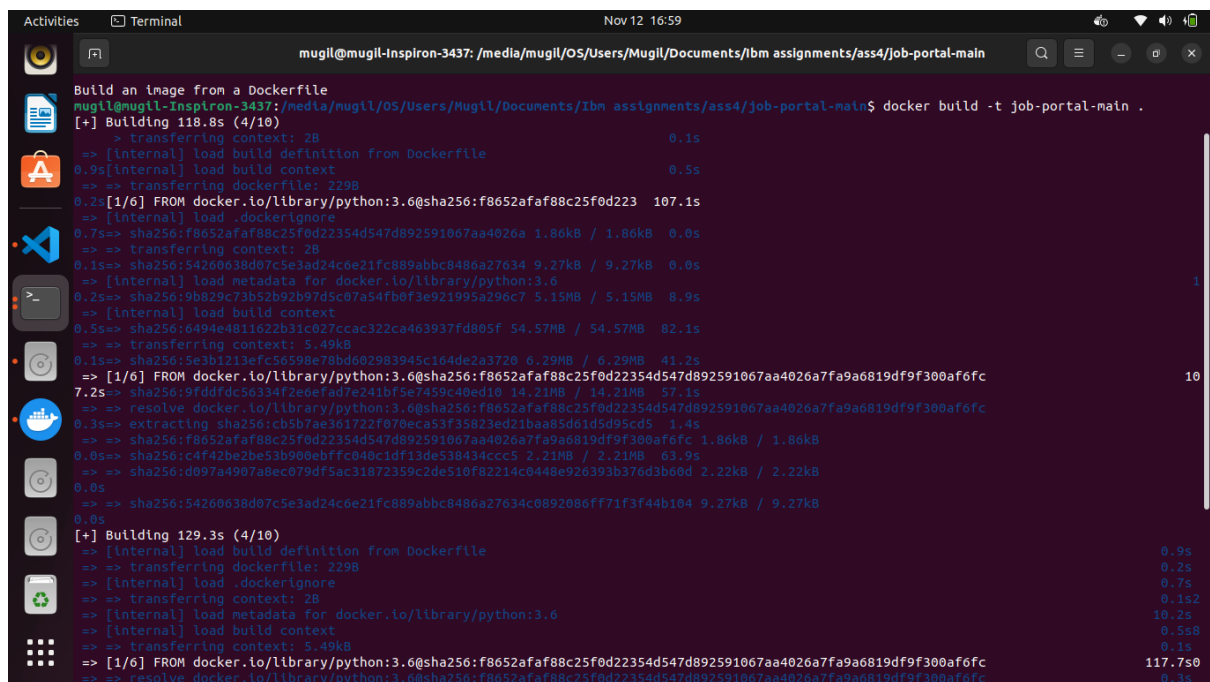

COPY requirements.txt /app

RUN python3 -m pip install -r requirements.txt

RUN python3 -m pip install ibm\_db

EXPOSE 5000

CMD ["python", "app.py"]

The screenshot shows a terminal window with the following content:

```
